Some highlights of the tour:

Briksdalsbreen Glacier

Our tour takes you to the mighty Briksdalsbreen Glacier, in the Jostedal National Park: From a height of 1,200 metres, the wild glacier wall falls steeply down to the narrow valley - it takes your breath away!

Vøringsfossen Waterfall

When you visit Vøringsfossen waterfall you will experience a gigantic spectacle at one of Norway's most famous sights: huge masses of water plunge down the freefall from an impressive 145 metres!

Hardangervidda

On the largest plateau in Europe - the Hardangervidda with an area of about 8,000 sqm - you can expect large plateaus and high mountains, but also deep and fertile valleys. With a bit of luck you might even experience one of the largest wild reindeer tribes in Europe!

Trollstigen

The Trollstigen winds its way in 11 hairpin bends (each with its own name!) from the Isterdalen valley up to the Stigrøra pass. It is worth riding along the mountain road: Halfway along the route there is a natural stone bridge over the impressive Stigfossen waterfall.

Geiranger Skywalk

The Geiranger Skywalk offers probably the most wonderful view in the world: Mount Dalsnibba is 1,500 metres above the fjord level in Geiranger, here you look over snow-covered peaks down to the Geirangerfjord. The road to Dalsnibba is a series of great hairpin bends!

7 sisters

On our mini-cruise to the 7 sisters we can participate in a wonderful natural spectacle: At the abandoned farmhouse Knivsflå, 7 waterfalls fall vertically into the Geirangerfjord - with an average free fall of 250 metres! What a spectacle!
