No, we didn't go among the stunt riders, I'm sure others can do better! You can learn to ride a wheelie, but you can learn to ride a wheelie with us.

Since we are on the road for years virtually (almost) only with training wheels, we have thought about how we can implement this on a wheelie - training intensive. The result can be seen in the pictures. We do not see ourselves as a wheelie school and we do not train stunt riders. With our special Wheelie Trainer, we give you - of course under guidance - the possibility to learn wheelie riding with our motorcycles, or to get a feeling for riding on the rear wheel. You can't roll over backward and you can't tip to the side.

Riding on only one wheel has certainly nothing to look for in road traffic and also on the racetrack does not make it fast. However, it is quite cool if you can and any mastery of the bike makes it safer.

In this training, we ride per motorcycle with only three participants under the supervision and guidance of an instructor.
