

Girls only: lean angle training (M-ID: 3101)

<https://www.motourismo.com/en/listings/3101-girls-only-lean-angle-training>

from €260.00

Dates and duration (days)

Absolutely unique in Germany, you will ride in the pure GIRLS ONLY - LEAN ANGLE TRAINING in Wesendorf on a BMW GS1250 GS or BMW F900 R, exclusively converted by our in-house BOXER FACTORY as a wingbike, into a very safe leaning position.

In this curve training you learn with your small group (max. 5 participants!):

- how you remove the barrier in your head
- an active sitting posture
- Correct eye tracking and choice of lines
- different riding techniques
- how to react correctly in emergency situations and
- you learn the function of the Helite airbag vest.

You will be surprised what is possible and what is taught on this girls' day. In this women's workshop for a carefree and safe leaning position, you will soon notice: curves are the best part of riding a motorcycle!

In your small group with a maximum of 5 girls, you ride the curves on one of our BMW R1250 GS or BMW F900 R, which have been converted exclusively for the Incline Training Course. We have used our know-how and experience to create wingbikes that are unique in Germany. Because we know what is important when it comes to boom instruction! This is how the cornering technique training becomes a sure pleasure!

Does the natural barrier in your head also prevent you from leaning more than 20°? Often it's because a curve has been misjudged, or it has not been hit or hit correctly - and bang, the lock is there. With the help of your trainer you will learn how to overcome it. On the Wingbike you can safely lie down in the curve and learn how deep you can really get on the road - well looked after and without danger.

To prevent critical situations, you will learn the correct cornering technique and become more and more confident during lean angle training. In this way, you will be able to

control your bike in dangerous situations, from which you can only escape with a low lean angle. For an even safer riding experience and comprehensive protection, you can test the Helite airbag vest and put the functions of this "life-saver in an emergency" through their paces.

With the GIRLS ONLY - LEAN ANGLE TRAINING you will learn the different riding techniques and also train your gaze, line selection and an active sitting position. You will practice all this on this day with your instructor in a pure women's group. You can bet that curves afterwards will be your new passion?

And to make sure that they stay that way, it means continuing to ride curves after training and practice, practice, practice. Because only then does what we teach during the LEAN ANGLE-TRAINING become true: The safer the motorcyclists, the fewer accidents. With the curve training in Wesendorf we contribute to this!

We are convinced that after the GIRLS ONLY - LEAN ANGLE TRAINING you will be sitting even safer on your bike. For the overwhelming feeling of being able to master even the tightest curves with bravura!
