The "High Meissner" is the highest mountain and at the same time the largest coherent basalt massif in northern Hesse as well as part of the geo nature park "Frau-Holle-Land".

A nature reserve, which was already designated in 1970, surrounds the mountain top in a ring shape. Around the High Meissner there is pure nature: rare plants, bizarre rock formations and a lot of foresight. The High Meissner and its surroundings are part of one or the other tour through the western Thuringian Forest and / or the Eichsfeld.

Rich in curves and with a magnificent view, this tour offers a lot of unique things. Few village crossings, a lot of nature and magnificent views are guaranteed here.
