Dates and duration (days)

New Zealand - kissed by the coasts. Towering alpine peaks, glistening glaciers, deep fjords, turquoise bays, white beaches, steaming volcanoes, and crystal clear lakes. There's nothing in New Zealand that doesn't exist.

Here, intact nature reigns alone. It blooms here and there, extremely lush vegetation proliferates everywhere and it inspires untouched. The few people hardly disturb, are even most welcome, if they offer amid the fascinating landscapes a cozy place to spend the night. In New Zealand, you are literally spoiled for choice. That's why we have put together a trip that lacks nothing and includes every highlight.

Many rave about New Zealand and all want to go there. From towering alpine peaks, glistening glaciers, deep blue fjords, turquoise bays with white beaches, to steaming volcanoes on crystal clear lakes. Scenically, there is nothing that does not exist. It blooms here and grows there, an extremely lush vegetation proliferates everywhere. Nature inspires untouched. Through it lead roads, which lay in many round curves. When the waves of the Pacific Ocean crash against the roadside and the spray splashes the visor, it's fun to explore. With so much on offer, you're always spoiled for choice. This is why it's important to see everything worth seeing. On a trip where nothing is lacking and every highlight is approached in a winding way. So that you can say happily and contentedly that you have seen it - the promised land.
